of the Founding of Academy**

ON Friday and Saturday, April ninth and tenth, 1915, the Academy will celebrate the Twenty-fifth Anniversary of its existence. The officers of the Academy are most anxious that a large representation of members from all sections of the country be present. PRACTICAL HANDBOOK OF MODERN LIBRARY CATALOGING

By

WILLIAM WARNER BISHOP, A.M.

SUPERINTENDENT OF THE READING ROOM
LIBRARY OF CONGRESS

A manual of the American practice of cataloging, based on the use of printed cards from the Library of Congress, but including also a full treatment of the making of a card catalog on modern principles independently of the printed cards. Not a code of cataloging rules, but a treatise on the practical management of a cataloging department. Prepared primarily for library school students and for librarians of the smaller and the specialized libraries. The book takes up in detail all problems of administration and organization which have to be met in cataloging and gives information as to different ways of treating them.

There has been hitherto no adequate treatise in English on this phase of library work, and none whatever based on modern American practice in cataloging, which has been revolutionized by the printed card.

The author has put into this book the observations resulting from his nineteen years practical experience in both making and interpreting catalogs in the various libraries in which he has served. These range from a school library with limited funds to the Library of Congress with its unrivalled equipment.

Price \$1.00 net, postage free in the United States.
To foreign countries, postage 6 cents additional.

The Right Way To Judge A Typewriter

is to compare the work of old machines—not that of new ones. Any new machine should do good work, but what you want to know is the kind of work it will do after a year's hard service. Measure it by this test.

The VICTOR Typewriter MODEL No. 3

is incomparable.

It has a type bar that stands on an inch-wide bearing and cannot vibrate as it reaches the printing center. Result: permanently perfect alignment.

It has a platen that is as firm as the bed of a printing press, and an escapement that is free from springs or any other flimsy contrivances; consequently, it is as positive and accurate in its action after hard use as it was when you first bought it.

A trial demonstration will prove this, and will cost you nothing.

Send today for our handsome catalogue describing this masterpiece of typewriter construction.
